

Assignment -4

Team Id	PNT2022TMID52316
Student Name	SUJI S
Student Roll Number	963519106035

Write code and connection in Wowki for ultrasonic sensor.

Whenever distance is less than 100 cm send “Alert” to IBM cloud and display

Step 1 : Add new device in IBM cloud

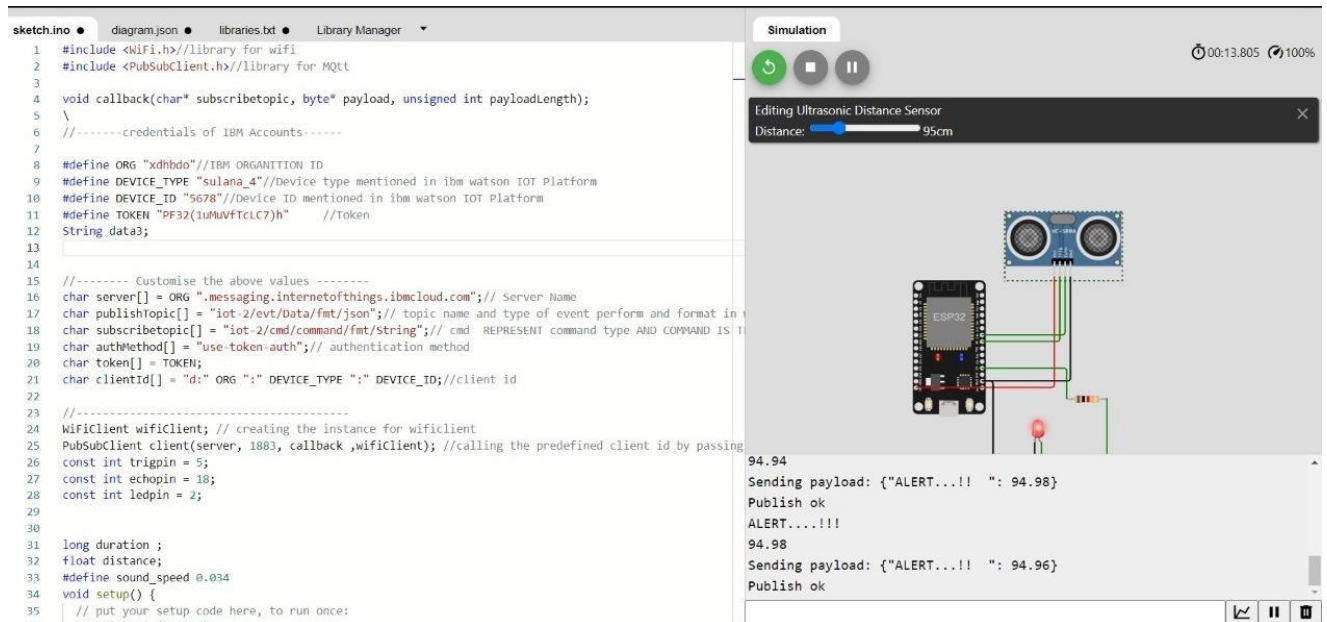

The screenshot displays the 'Browse Devices' interface in the IBM Watson IoT Platform. The page includes a sidebar with navigation icons and a top navigation bar with tabs for 'Browse', 'Action', 'Device Types', and 'Interfaces'. A blue 'Add Device' button is located in the top right corner. Below the navigation bar, the 'Browse Devices' section features a search bar and a 'Diagnose' button. A descriptive text states: 'This table shows a summary of all devices that have been added. It can be filtered, organized, and searched on using different criteria. To get started, you can add devices by using the Add Device button, or by using API.' The main content area contains a table with the following data:

	Device ID	Status	Device Type	Class ID	Date Added	Descriptive Location
>	1234	Disconnected	abcd	Device	Oct 12, 2022 6:29 PM	
>	123456	Disconnected	aaaa	Device	Oct 12, 2022 6:43 PM	
>	5678	Connected	sulana_4	Device	Oct 24, 2022 12:08 PM	

At the bottom of the table, there is a pagination control showing 'Items per page 50' and '1-3 of 3 items'. On the right side of the table, there is a 'Device Simulator' toggle switch and a filter icon.

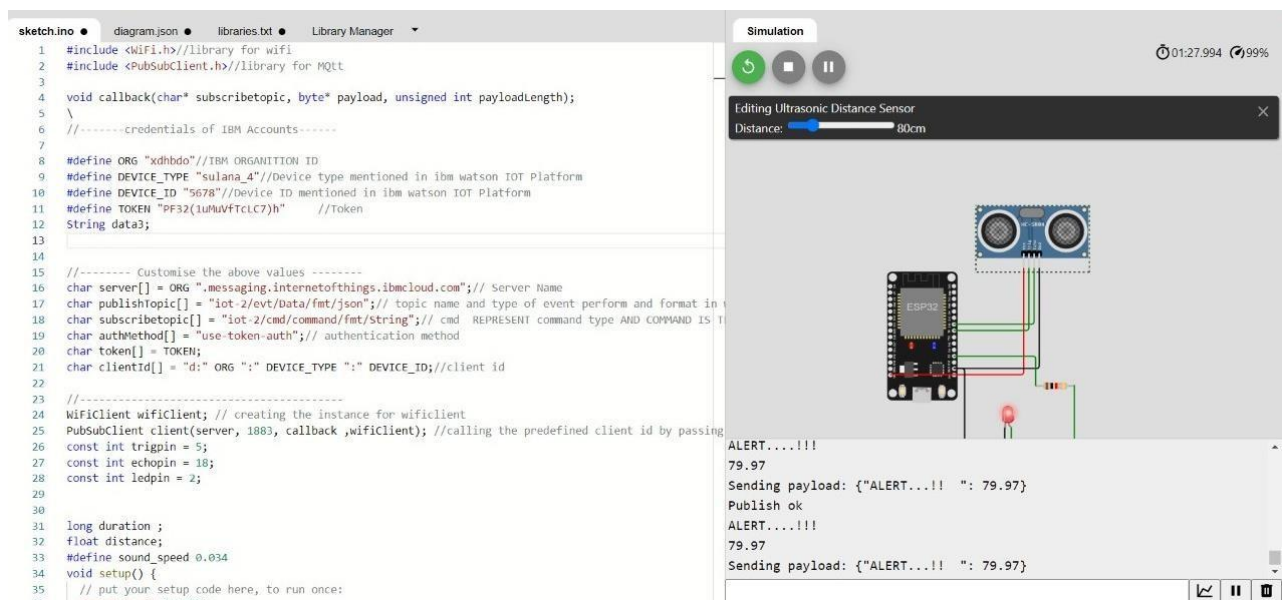

Step 2: Complete the Circuit and run the program

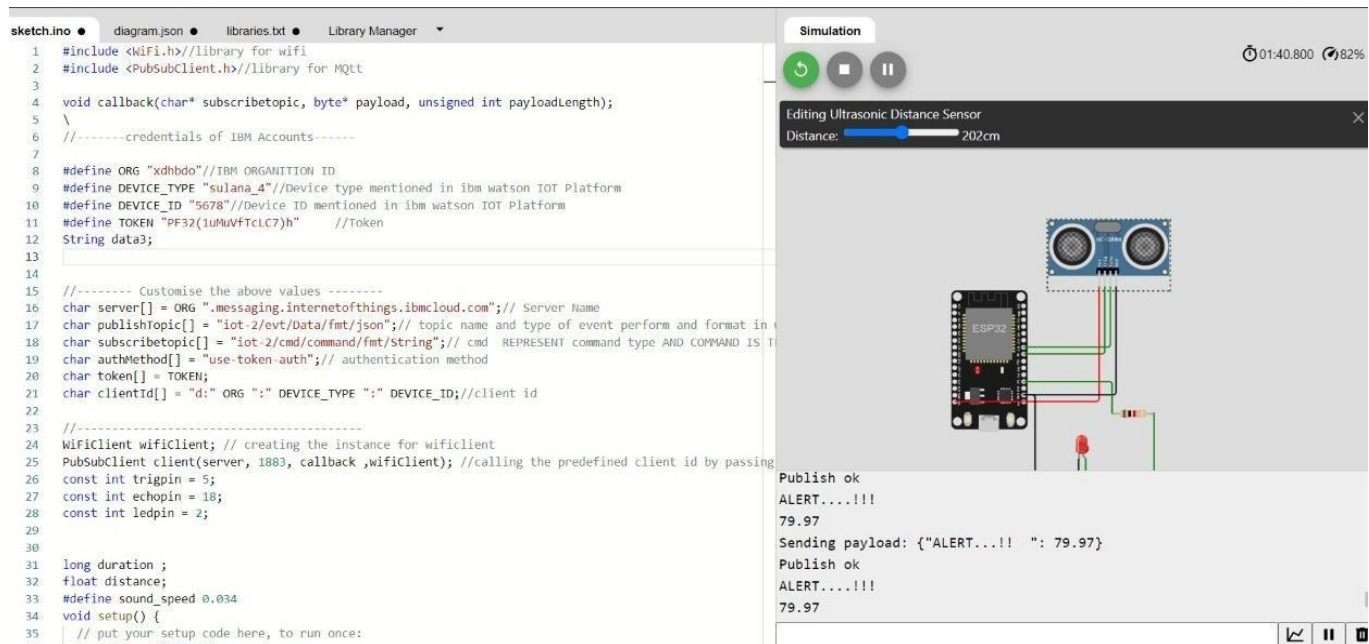

Output in WOWKI

a) when the distance is below 100 cms

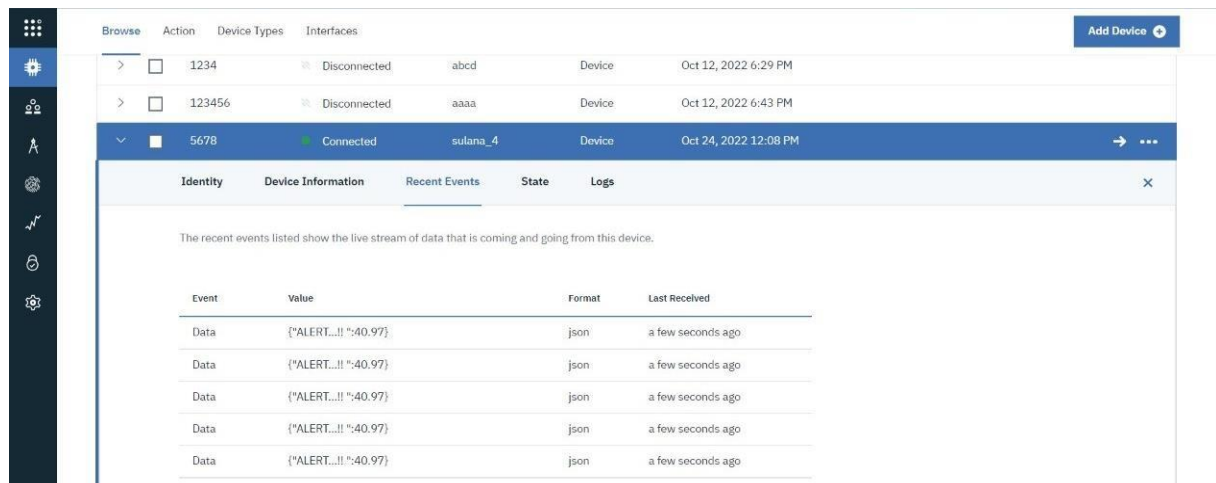

b) when the distance is above 100 cms ,(no alert message is displayed here for 202 cm)

Output in IBM CLOUD (Watson Platform)

Displayed in device recent events

Program Code:

```

#include <WiFi.h> //library for wifi
#include <PubSubClient.h> //library for MQTT
void callback(char* subscribtopic, byte* payload, unsigned int payloadLength);
\
//-----credentials of IBM Accounts-----
#define ORG "xdhbdo" //IBM ORGANITION ID
#define DEVICE_TYPE "sulana_4" //Device type mentioned in ibm watson IOT Platform
#define DEVICE_ID "5678" //Device ID mentioned in ibm watson IOT Platform
#define TOKEN "PF32(1uMuVfTcLC7)h" //Token
String data3;
//----- Customise the above values -----
